Selected as one of the "Outstanding Integrated Reports" by the GPIF's domestic stock management organization

The "Integrated Report 2020" of the FUJI OIL Holdings has recently been selected as the "Outstanding Integrated Reports" selected by the domestic stock management agency of the Government Pension Investment Fund (GPIF).

At the request of GPIF's domestic investment trust management organization, an "Outstanding Integrated Reports" and a "highly improved integrated report" were selected. In this selection, a total of 77 companies were selected as "Outstanding Integrated Reports", and among them, we were listed as a company that received high evaluations from many investment institutions.

"FUJI OIL Integrated Report 2020" was recognized for the following reasons.

- For a food company with a diverse procurement structure, it is commendable that the company discloses its supply chain management in such depth and in a concrete manner (e.g., analysis of the level of importance of sustainability strategy and progress rate).
- The CFO's financial strategy is described in detail. In addition, the short-term results, medium-term plan, and long-term policy are presented, which is useful for evaluating the company on a time axis.
- The explanations in the form of reports by each chief officer, including ESG, are unique and the contents are highly convincing.

The FUJI OIL Group will continue to strive to further improve our integrated reporting and engage in meaningful dialogue with our investors and other stakeholders.
