## 2. Key points of financial accounting

## 1Q/FY2018

- Sales strategy focused on profitability for oils and fats in Japan and confectionary and bakery ingredients in the Americas resulted in increased profits.
- Oils and Fats: Although North America was impacted by scheduled maintenance and cold weather, income increased thanks to a continued focus on profitable sales in Japan and on improved raw material costs in Europe.
- Confectionery Although profits from food ingredients declined in Southeast Asia, income improved on strong filling and Bakery Ingredients:
- Soy:

Although sales of protein ingredients and other high-value added products were firm and the soy business in China saw improved revenues, income decreased due to partial plant shutdowns related to facility investments and a delay in sales recovery after plant operations were resumed.

- Net income Recorded 460 million yen in extraordinary losses due to impact of Northern Osaka Earthquake. attributabnle to
Owners of
parent:
- CCC is 103 days, the same as the previous year.

## Key points

## 1Q／FY2018

－From FY2018，we have changed format so that corporate expenses recorded for the Group main office and certain area management company are indicated separately．
－Due to the realignment of Fuji Oil Thailand（Oils and Fats $\rightarrow$ Confectionery and Bakery Ingredients），results are presented after retroactive adjustments．Group administrative expenses are not recorded within operating income of each segment．
－Japan ：Revenues for oils and fats increased significantly on improved profitability due to continued sales focused on profitability Income from confectionary and bakery ingredients decreased．Although sales of chocolate for gift products，etc．were firm，sales of emulsified and fermented ingredients decreased．
Income from soy decreased．Although sales of high function value added products increased，income decreased due to a shutdown of operations at our protein food ingredients plant for work related to capacity expansion．
－Asia ：Income decreased despite higher sales of hard butters for chocolate in Southeast Asia and China．Sales of confectionary and bakery ingredients remained favorable in China but income decreased on declining profitability for food ingredients in Southeast Asia．Expanded sales of high－value added soy products and secured a profit by focusing on profitable sales
－Americans ：Income from oils and fats decreased due to a plant shutdown as a result of cold weather in North America．Income from confectionary and bakery ingredients increased on improved profitability in Brazil．
－Europe ：Income from raw materials increased thanks to improved profitability．
－Consolidated Income from confectionary and bakery ingredients increased on the impact of unrealized gains from inventory assets． Adjustment：

1Q/FY2018 revenues decreased due to a sales strategy focus on profitability for oils and fats and lower sales of emulsified and fermented ingredients and soybean foods. Operating profit increased on improved profitability for oils and fats and chocolate sales growth.

For full-year FY2018, we will work to improve profitability for emulsified and fermented ingredients, and continue to expand chocolate sales, planning for increased profits by covering with expanded sales of highvalue added soybean products.

In 1Q/FY2018, income decreased despite higher sales volume for filings and margarine in China due to decreased sales of hard butters for chocolate and declining profits for food ingredients in Southeast Asia.

- For full-year FY2018, we forecast China will record increased income thanks to sales growth for high valueadded soy products and stronger sales for filings, etc. In Southeast Asia, we forecast higher income thanks to increased sales of hard butters for chocolate despite decreased income from confectionary and bakery ingredients due to market price factors.
