Maintain a recycling rate of at least 99.8%

Management

Environmental management

- > Basic approach
- > Environmental audits
- > Training
- > External recognition
- > Management system
- > Acquisition of management certifications
- > Compliance with environmental laws and regulations
- > Goals / Results

Activity report

■ Areas to create initiatives that lead the industry, leveraging our business strength
■ Business foundation areas

Climate change mitigation and adaptation

Priority theme: CO₂ emissions reduction

- > Relevance to our business
- > Basic approach
- > Management system
- > Goals / Results
- > Next step
- > Specific initiatives

Conservation of water resources

Priority theme: Water use reduction >

- > Relevance to our business
- > Basic approach
- > Management system
- > Goals / Results
- > Next step
- > Specific initiatives

Resource circularity

Priority theme: Waste reduction >

- > Relevance to our business
- > Basic approach
- > Management system
- > Goals / Results
- > Next step
- > Specific initiatives

Priority theme: Food loss and waste reduction >

- > Relevance to our business
- > Basic approach
- > Management system
- > Goals / Results
- > Next step
- > Specific initiatives

Plastic use reduction >

- > Relevance to our business
- > Basic approach
- > Management system
- > Goals / Results
- > Specific initiatives

Environmentally conscious manufacturing

Priority theme: Reduction of the environmental impact of products and raw materials >

- > Relevance to our business
- > Basic approach
- > Management system
- > Goals / Results
- > Next step
